

Jane Doe

Software QA Engineer | SDET

Springfield, USA | jane.doe@example.com | github.com/janedoe-example

SUMMARY

QA Engineer with 4+ years of experience in UI, API, and mobile automation, backend validation (MySQL, Redis, Kafka), production debugging (Grafana, Kibana), and AI-assisted test design. Focus on reliable frameworks and release confidence.

EXPERIENCE

Software QA Engineer — Acme Fintech Inc.

Feb 2025 – Present | Springfield, USA

- Raised automation coverage from ~20% to ~90% on critical flows (Selenium, Playwright).
- Debugged 100+ production issues using Grafana, Kibana, API traces, and DB state.
- Built Java/Python frameworks for UI, API, mobile (Appium); Jenkins CI/CD integration.
- API suites with RestAssured and Postman; validated MySQL, Redis, and Kafka workflows.

SELECTED PROJECTS

- Checkout Enhancement QA — E2E checkout, pricing, settlement; UI/API/DB regression.
- Portfolio Management Workflows — Buy/holdings validation; Redis/Kafka backend checks.
- Order Fulfillment QA — Fulfillment pipeline, delivery state transitions.

SKILLS

Automation: Selenium, Playwright, Appium, TestNG, Pytest | Languages: Java, Python, TypeScript

API: RestAssured, Postman | Data: MySQL, Redis, Kafka | CI/CD: Jenkins, Docker, Git

Observability: Grafana, Kibana | AI-assisted QA: Claude Code, Cursor, MCP
